1

Describing a picture

1 Look. What can you see? Write (✓) or (X).

1 three rocks

2 three trees

3 five flowers

4 the sun

5 two clouds

6 six spiders

2 Now read and check.

In the picture, there are four flowers. Next to the flowers there are two rocks. There are six ants on the rocks. Next to the rocks there are three trees. Behind the rocks there is a pond. The sun is in the sky. Next to the sun there are two big clouds. It is sunny and cloudy. Under the clouds there are five birds.

3 Read again. Then circle.

1 The rocks / birds are next to the flowers.

2 There are four / five birds.

3 The birds are under / next to the clouds.

4 There is a pond behind / next to the rocks.

5 It is windy / cloudy.

4 Match the two parts of the words.

po mush sect
 in bi rds nd
 ro clou rooms ds ck

5 Find four insects.

6 Read and complete.

There are six spiders plus thirteen ants in the garden. That equals ¹ _____ insects.

There are twelve books on nature in the library plus eight dictionaries. That equals ² _____ books.

There are twenty children in the playground plus thirty in the classroom. That equals ³ _____ children in the school.

7 Write. Then match.

- 1 $14 + 5 =$ Fourteen plus five equals _____ a eighteen
 2 $30 + 10 =$ _____ b nineteen
 3 $6 + 12 =$ _____ c ten
 4 $17 + 13 =$ _____ d forty
 5 $2 + 8 =$ _____ e thirty

Remember

There **is** one fl ower

There **are** two fl owers

There **is** one ant

There **are** six ants

8 Draw a nature picture. Then write.

- What's in the picture?
- How many birds, ants and trees are there?
- Where are they?
